PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building scalable backend systems, AI-powered applications, and data-driven solutions. Proficient in Python, Django, FastAPI, and REST API development, with a collaborative, agile work style and a strong focus on delivering production-grade software. Experienced in deploying real-world applications using LLM integration (Llama 3.3 70B via Groq API), transformer-based NLP pipelines, and cloud platforms — eager to contribute to impactful backend or AI/ML engineering teams. Additionally conducted independent research in Django performance optimization, achieving a 99.98% reduction in response time on a 9-million-record MySQL dataset through ORM tuning, pagination, and caching.

TECHNICAL SKILLS

Languages & Programming: Python, SQL (MySQL, SQLite), JavaScript (Basic), HTML5, CSS3

Database & Query Optimizing: MySQL, SQLite, ORM Query Tuning (Django `select_related()`), Pagination, Caching, REST API integration

Backend & Frameworks: Django, Django REST Framework, FastAPI, Streamlit

Software Development: Agile Methodologies, Modular Architecture, Unit Testing, Debugging, Code Documentation

Data & Analysis: MS Excel (Data Analytics & Reporting), Pandas, NumPy, Scikit-learn, EDA, Statistical Analysis, Data Modelling

Tools & Platforms: MS Excel (Advanced / Pivot Tables), Git, GitHub, VS Code, Amazon EC2, Jupyter Notebook

Transferable to SAP/ABAP: Structured data processing, enterprise backend logic, cross-functional collaboration, performance optimizing

RELEVANT PROJECTS

FitCoach AI — Indian Fitness & Diet Chatbot Python · Streamlit · Groq API · Llama 3.3 70B · Streamlit Cloud

- Built and deployed a live AI-powered fitness chatbot using Groq's Llama 3.3 70B model with real-time streaming responses, modular Python architecture (5 separate modules for UI, API, config, utils, and prompt engineering), and secure API key management via Streamlit Secrets.
- Engineered personalized health features including a BMI/TDEE calculator, Indian meal plans with calorie counts, and goal-based workout routines — driven by a structured user profile system that injects context into every LLM call.
- Deployed the application on Streamlit Community Cloud with zero infrastructure cost, achieving full public accessibility via GitHub-integrated CI/CD with automatic redeployment on every push.

Django Web Application — Performance Optimizing Research Python · Django · MySQL · Locus

- Conducted load testing on a Django application backed by a 9M-record MySQL dataset using Locust, simulating concurrent enterprise-level traffic to benchmark and optimize backend performance.
- Reduced average response time by 99.98% (354s → 57ms) by applying ORM query optimizing (`select_related()`), pagination, and view-level caching — directly analogous to ABAP performance tuning on HANA.
- Increased request throughput from near-zero to 13 RPS; documented a reproducible, evidence-based optimizing methodology with diminishing returns analysis.
- Produced structured technical documentation capturing methodology, metrics, and findings for future reference — aligning with the JD requirement for software process documentation.

Hybrid AI Dream Interpretation System Python · Django · Transformers · REST APIs

- Designed and built a scalable Django backend with structured data storage to support longitudinal data analysis — demonstrating understanding of enterprise data modelling principles.

- Implemented modular NLP pipeline integrating transformer models and REST APIs; system architecture parallels ABAP module design in SAP environments.
- Collaborated on translating complex requirements into technical specifications, then tested and validated system behavior across multiple integration points.

Face Recognition Authentication System Python · OpenCV · Django · Data Management

- Engineered a real-time data pipeline for feature extraction and structured dataset management — training, labelling, and validating recognition models through iterative testing.
- Achieved reliable performance through systematic threshold tuning and debugging, demonstrating quality assurance practices aligned with enterprise software standards.

PROFESSIONAL EXPERIENCE

Operations Advisor | Concentrix Daksh Pvt. Ltd., Gurugram

June 2025 – Feb 2026

- Managed operational data workflows and performance dashboards ensuring accuracy and timely delivery — building familiarity with enterprise data management in a corporate Gurugram environment.
- Coordinated cross-functional data collection to track KPIs and support evidence-based decision-making, directly aligning with the JD's cross-functional collaboration requirement.
- Identified process bottlenecks through systematic data review and contributed to operational improvements, demonstrating structured problem-solving skills.
- Maintained SLA targets across team deliverables, demonstrating accountability and team-oriented work culture consistent with Agile project delivery.

Customer Support Advisor (Internship) | Ferns N Petals Pvt. Ltd., Gurugram

Jan 2024 – Feb 2024

- Completed a professional internship with FNP E Retail Pvt. Ltd. from January 22, 2024, to February 21, 2024.
- Actively contributed to the Customer Operations Department, ensuring efficient service and operational support.
- Recognized by senior leadership for maintaining high standards of punctuality, hard work, and sincerity throughout the internship tenure.

EDUCATION

B.Sc. (Hons.) Computer Science

Ramanujan College, University of Delhi

Sep 2022 – Sep 2026
